Appl. No. 09/843,462 Amendment dated September 17, 2004 Reply to Office Action of May 17, 2004

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

Claim 1 (currently amended). A method for measuring cyclin-dependent kinase 2 (CDK2) activity in a sample, said method comprising:

i) contacting said sample with an anti-retinoblastoma protein (Rb) capture antibody, that specifically recognizes Rb protein phosphorylated at Ser249, Thr252, Thr356, Ser612, [[Ser780]], Ser807, Ser811, or Thr821, and isolating the capture antibody-Rb complex; ii) contacting said capture antibody-Rb complex with an anti-Rb primary antibody and

- ii) contacting said capture antibody-Rb complex with an anti-Rb primary antibody and isolating the capture antibody-Rb-primary antibody complex; and
- iii) measuring the amount of CDK2-phosphorylated Rb in said sample by quantitating the primary antibody present in said capture antibody-Rb-primary antibody complex.

Claim 2 (cancelled).

Claim 3 (cancelled).

Claim 4 (original). The method of claim 1, wherein said method measures intracellular CDK activity.

Claim 5 (original). The method of claim 4, wherein said method measures CDK activity in a cultured cell.

Claim 6 (original). The method of claim 4, wherein said method measures ex vivo CDK activity in a cell taken from an animal.

Claim 7 (original). The method of claim 1, wherein said CDK activity is human CDK activity.

Claim 8 (original). The method of claim 1, wherein said capture antibody is bound to a test plate.

Claims 9-19 (canceled).

Claim 20 (original). The method of claim 4, wherein said method measures ex vivo CDK activity in a cell taken from an animal.

Claims 21-23 (canceled).
